March 7, 1995  
NUMBER 7730.64

*Supersedes AD-A272861*

USD (P&R)

SUBJECT: Automated Extracts of Manpower and Unit Organizational Element Files

- References:
- (a) DoD Instruction 7730.64, "Automated Extracts of Military and Civilian Manpower Records," December 27, 1988 (hereby canceled)
  - (b) DoD Instruction 1336.5, "Automated Extracts of Active Duty Military Personnel Records," August 17, 1993
  - (c) DoD Instruction 7730.54, "Reserve Components Common Personnel Data System (RCCPDS)," March 15, 1991
  - (d) DoD Instruction 1444.2, "Consolidation of Automated Civilian Personnel Records," September 16, 1987
  - (e) through (k), see enclosure 1

**A. REISSUANCE AND PURPOSE**

This Instruction reissues reference (a) to implement policy, update responsibilities, and establish a requirement for reporting manpower authorization, requirement, individuals account, programmed manpower structure, and unit data.

**B. APPLICABILITY AND SCOPE**

This Instruction:

1. Applies to the Office of the Secretary of Defense (OSD), the Military Departments, the Chairman of the Joint Chiefs of Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Uniformed Services University of the Health Sciences, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "the DoD Components"). The term "Military Services," as used herein, refers to the Army, the Navy, the Air Force and the Marine Corps.

2. Requires identification of and accounting for all Active military, Reserve military, and civilian (both direct hire and indirect hire) billets and on all units in the programmed force structure.

**C. POLICY**

It is DoD policy to maintain a centralized DoD database on manpower required and authorized to operate the approved force structure. These data supplement various DoD personnel inventory data provided by DoD Instructions 1336.5, 7730.54, and 1444.2 (references (b) through (d)). A centralized DoD database of all units (any DoD organizational entity identified with a unique identification code) is also required. This reporting requirement

DISTRIBUTION STATEMENT A  
Approved for public release

19950822 075

provides information for oversight and evaluation of programs and policies on staffing, inventory imbalances, manpower utilization and mix, personnel staffing and training, and units.

D. RESPONSIBILITIES

1. The Under Secretary of Defense for Personnel and Readiness, as the primary DoD manpower advisor, shall:

- a. Provide policy guidance relative to the DoD's overall manpower and unit information requirements.
- b. Maintain oversight on the content and currency of manpower and unit data required by this Instruction.
- c. Charter an Advisory Group for Manpower and Unit Data described in this Instruction. This Group shall meet periodically for ensuring manpower management information system validation, standardization, and integration.
- d. Ensure that the Advisory Group for Manpower and Unit Data serves as a forum for discussion and resolution of issues arising from the implementation of this Instruction. It shall be chaired by a representative from the Requirements Directorate within the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD(P&R)) and include representatives from the Office of the Assistant Secretary of Defense for Reserve Affairs, the Department of Defense Washington Headquarters Services, the Defense Manpower Data Center (DMDC), each of the Military Services, and the Chairman of the Joint Chiefs of Staff. The group representatives shall seek out methods to facilitate the efficient transfer of accurate data and attempt to ensure the proper use and interpretation of the data supplied. The group is empowered to make technical adjustments to the data submissions that are mutually agreeable to the affected organizations, OUSD(P&R) and DMDC.
- e. Ensure that the Director, DMDC, serves as custodian of all automated extracts of manpower and unit organizational element files and provides technical assistance, data quality control, inquiry capabilities, and administration and computer support.

2. The Director of Administration and Management, Office of the Secretary of Defense shall submit manpower and unit organizational element data on behalf of OSD, the Chairman of the Joint Chiefs of Staff, the Advanced Research Projects Agency, the Defense Legal Services Agency, the Defense Security Assistance Agency, the US Court of Military Appeals, and all DoD Field Activities except the DoD Dependents Schools.

3. The Secretaries of the Military Departments, the Inspector General of the Department of Defense, and the Heads of Defense Agencies and DoD Agencies and Field Activities not listed under subsection D.2., above, shall ensure that their respective organizations comply fully with this Instruction. The Defense Intelligence Agency is exempted from the provisions of this Instruction based on Public Law 100-178.

E. INFORMATION REQUIREMENTS

1. Reporting shall be in accordance with the definitions in enclosure 2 and consistent with the methodology used to provide data for preparation of the Defense Manpower Requirements Report (reference (e)) and the Department's Future Years Defense Program (FYDP) (DoD 7045.7-H, reference (f)).

2. DoD standard data elements and codes established by DoD 8320.1-M (reference (g)) or Joint Pub 1-03.3 (reference h) shall be used, where applicable. When source files contain codes different from the standard published in references (g) or (h), conversion to the DoD standard is the responsibility of the submitting organization, provided a conversion mechanism exists.

3. The classification and security guidance in DoD 5200.1-R (reference (i)) and DoD 5200.28-M (reference (j)) apply. A list of data elements or categories requiring protection, plus a level of classification, shall be included in the implementing documents to this Instruction. Each organization shall provide a Classification Guide to DMDC for use in conjunction with the data submitted under this Instruction. Record fields 6 and 9 of the Billet Master File format (enclosure 3) and record field 5 of the Unit Master File format (enclosure 4) all relate the security classification of the data. Unless otherwise stated, the overall security classification of the Billet Master File submission shall reflect the record with the highest classification of either record field 6 or 9. For the Unit Master File submission, the highest security classification shall reflect the record with the highest classification level recorded in record field 5. If both the Billet Master File and Unit Master File are submitted together, the overall security classification shall be managed as the highest classification level of either file.

4. This Instruction may require submitting organizations to collect those data elements that exist in different automated systems and submit them in the proper formats and coding structures. In cases where the required formats or coding structures do not correspond to available data structures in current organizational systems, DMDC is available to assist the affected organization in converting to the proper formats and structures.

5. Reporting shall be accomplished through magnetic cartridges, tapes, or diskettes, labeled as specified in enclosure 5. Two reports are required: the Billet Master File and the Unit Master File. Accompanying each Billet and Unit submission shall be sufficient documentation describing deviations from the specified format, any coding changes to data elements, and total number of records in each file. See enclosure 5. For the Billet Master File, the documentation shall also list the current year authorization totals for each component, and category of personnel reported.

6. The Billet Master File shall be formatted according to the specifications contained in enclosure 5. The Billet Master File shall reflect the lowest level of aggregation maintained by the submitting organization. All billets, military and civilian, shall be reported by the Military Services. Reporting is required for the following fiscal years (FYs): current year, budget year, and budget year plus 1. Data for each reported year shall reflect the end of FY data.

7. The Billet Master File submissions shall reflect end of FY data and shall be submitted two times per year as follows:

- a. Data as of September 30 to be received at DMDC no later than December 1.
- b. Data as of March 31 to be received at DMDC no later than June 1.

8. The Billet Master File is assigned Report Control Symbol DD-FM&P(SA)-1807.

9. The Unit Master File shall be formatted according to the specifications in enclosure 4. It shall include a record for each unique Unit Identification Code (UIC), which identifies organizations having personnel, manpower, or other unit status information (i.e., separate hull number and personnel or manpower UICs). The report shall also contain a record for each unique combination of UICs, Major Command Code, and Unit ZIP Code. A UIC record shall be provided for every UIC referenced in the Billet Master File.

10. Unit Master File submissions shall contain information on all current unique units at the time of the submission. If the unit data is updated less often than four times per year, the DMDC should be notified for approval of an alternative submission schedule. This file shall be submitted four times per year as follows:

- a. Data as of September 30 to be received at DMDC no later than November 1.
- b. Data as of December 31 to be received at DMDC no later than February 1.
- c. Data as of March 31 to be received at DMDC no later than May 1.
- d. Data as of June 30 to be received at DMDC no later than August 1.

11. The Unit Master File is assigned Report Control Symbol DD-FM&P(SA)-1808.

F. EFFECTIVE DATE

This Instruction is effective immediately.

## DEFINITIONS

1. Authorizations (manpower). The aggregation of billets or positions in the programmed manpower structure for which resources have been allocated.
2. Billet or Position. A programmed manpower structure space typically defined by grade and occupation and associated with a specific unit or organization.
3. End Strength. The number of actual, or programmed in a pay status on the last day of a FY. End Strength includes personnel assigned to units and organizations in part- and full-time, temporary and permanent, seasonal, intermittent, direct and indirect hire employees paid with appropriated funds.
4. Grade. The pay grade requirement of a billet or position.
5. Individuals Account. A component of military end strength; the overhead allowance for transients, holdees (patients, prisoners, and separatees), students, trainees, and cadets or midshipmen for which funds have been allocated or requested.
6. Major Command or Major Organizational Element. Denotes major military operational command organizations and other major functional organizations within a DoD Component. For Services, the term is synonymous with:

Army: Assigned Command

Navy: Major Manpower Claimant

Marine Corps: Monitored Command

Air Force: Major Command and Sub-Command

7. Occupation. The specialty skill or job series that represents the minimum qualification requirement of a billet or position. Military occupational information shall be provided using Service coding schemes outlined below. If required by the billet, additional skill requirement information shall be included as part of the occupation.

Army: AOC/SI (commissioned officer)  
MOS/ASI/SQI (warrant officer)  
MOS/Skill Level/SQI/ASI/LS (enlisted)

Navy: Designator/NOBC/AQD/SSC (officer)  
Rating/NEC (enlisted)

Marine Corps: MOS (officer and enlisted)

Air Force: AFSC/SEI (officer and enlisted)

## DEFINITIONS, continued

8. OSD Functional Oversight Authority. That official, within OSD, assigned programmatic oversight responsibilities on specific mission or program areas. Functional oversight authorities are at the "Assistant Secretary of Defense," or equivalent level.
9. Program Element Code (PEC). A ten-position alphanumeric code that describes the mission supported by a billet, group of billets, or unit. The PEC is the basic building block of the budget and the FYDP.
10. Programmed Force Structure. The set of units and organizations that exists in the current year and which is planned and programmed for a given FY.
11. Programmed Manning. Those billets in the programmed manpower structure that are planned to be staffed with trained personnel at the end of the FY. Programmed manning is a statement of distribution policy; the term is synonymous with:
- |                   |   |
|-------------------|---|
| Army:             | Force Structure Allowance (MTOE and TDA Authorizations) |
| Navy:             | Distributable Billets                                   |
| Air Force:        | Force Structure Authorizations                          |
| Marine Corps:     | Authorized Strength Report                              |
| Defense Agencies: | Funded Requirements                                     |
12. Programmed Manpower Structure. The aggregation of billets describing the full manpower requirement for units and organizations in the programmed force structure. The programmed manpower structure does not include Individual Mobilization Augmentees and Individuals. For operational units, the term is synonymous with the "table of organization" structure (or its equivalent), and for non-operational units, it means the structure associated with full peacetime workload requirements. Operational units are those combat, combat support, and combat service support organizations with operational readiness reporting requirements under the Status of Resources and Training System.
13. Requirements (manpower). The aggregation of both funded and unfunded billets or positions representing the total manpower requirement for units and organizations in the programmed force structure.
14. Unit Identification Code (UIC). A six-position alphanumeric code used to identify units and organizations in the programmed force structure.
